This paper presents the concept and design of a punch planter for smallholder farmers. Additionally, we conducted interviews to better understand the reasons for such proactive behavior. Application of green-practices GP and IT-enabled-practices ITEP has been becoming increasingly important for many industry sectors and healthcare sector happens to be under scanner as one of the most lucrative sectors to investigate such relationships.

The design and development of the planter was conducted using the Design Method. Punch planters reduces the power demand in planting, being very suitable for conservationist practices. The benefits of sustainability-driven innovation and their impacts on performance under the three dimensions of economic, social and environmental performance has often not been adequately captured.

Symbolic Corporate Environmentalism and by Frances Bowen PDF Companies and paper concludes that the use of SD modelling seems useful for improving the capacity of reflexive and anticipatory dimensions of RI approach in practice. Published by Elsevier B.
