This is a good field guide to aquatic insects. No photos or illustrations good enough to make streamside IDs. Once they reach adulthood, they no longer eat—they just reproduce on land! Other groups have only a few field guides to choose from if any. There are definitely lots of cool looking bugs outside the groups of bugs most commonly studied. Phonepasid Phengchanthavong marked it as to-read Apr 02, Odonata are among the tips for distinguishing similar species and includes information for each species on behavior and role played in the ecosystem. Great for ID-ing critters!
