Hence the current situation, in which exports of the F can be discussed with some odds of success. BAE says that is willing to share more of its technology with Japanese companies, establishing Japan as a so-called home market where it manufactures and sells products. Development work would be required before production, however, which creates real problems.

Both the House and Senate versions of the defense authorization bill require This legislative branch agency works exclusively for Members of Congress, their committees and their staff. MHI will also be responsible for testing the jets stealth against radar. This report discusses issues surrounding Japan's interest in purchasing the FA Raptor aircraft from the United States. If Japan makes an FA purchase, it would probably buy about 60 airplanes. Even components such as the fuselage that would be built in the United States would incorporate additional Japanese-made

hardware. For previous editions of this report, try OpenCRS.
