The woods aren't safe for humans during the wolves' heat season, and Ian will do whatever it takes to survive. Good premise, lacked in execution IMO. If you're looking for a hot extreme alpha male HEA here you go, it was worth every penny. This brings in the first interesting theme in the book and I think it's a neat lot. But I gave it 4 stars because it did peak my interest on this world the author created. I loved the unique idea that "Wolves" here are an alien species and the world is well-built with backstory and detailed information that makes it all believable! Except this is less rapey, less BDSM, and less interested in dwelling on the sex. [Page 1 of 1 Start over](#) [Page 1 of 1](#). [Learn more about Amazon Prime](#).
