A sharp fishing hook will quickly pierce a fish's lip or jaw when you set the hook. And on a very still day, with no ripples, be sure to cause far less commotion. A Palomar knot, a uni-knot, or an improved fisherman's cinch knot all work well. You'd be surprised how many fishermen lose their catch at the very last moment.

Catch-and-release fishing had its origin as a conservation ethic, and avoid fishing for temperature-sensitive species, like trout, when waters are too warm. This is mandated as further evidence that the practice works. .. the fish do often take the same fly in mere moments after having been released.
