I also liked the illustration in the appendix about what happened when a teacher in the US gave a little girl an F. She is a former middle school science teacher and informal science educator, with specialization in urban education.

Teaching is an all-consuming job and taking classes, going to meetings. In math, the students typically must figure quickly using that software we call the brain, because they do not use calculators. Ripley highlights the lack of rigorous standards and assessments in this Oklahoma school as a proxy for the lack of rigor and resistance to change currently found throughout the United States.

I like this idea she and her mother complained about being 'giAs an educator, I never forget the science teacher who did not know several of the answers on the 8th grade MCAS test.
