If anything is unique about human language, that component should be absent in chimps and other apes. Nevertheless some of the experimental apes live on.

Yet scientists have debated whether humans are unique compared with the great apes. Select Tag Select Tag 3-D printing 3. These primates have developed a culture that makes routine use of a stone-based technology. However, the many affinities between humans and other primates – and especially the "great apes" – made it clear that the distinction made no scientific sense. Apes Extant Chattian first appearances. Why did our ancestors learn to make such sophisticated stone tools, and so long ago, while chimps and monkeys never got beyond a Lomekwian-style technology? Gibbons are found in the forests of South-east Asia.
